Paper 1

October 2015

1 hour plus 10 minutes' reading time

Candidates answer on the Question Paper.

No Additional Materials are required.

READ THESE INSTRUCTIONS FIRST

Write your Centre number, candidate number and name on all the work you hand in.

Write in dark blue or black pen.

Do not use staples, paper clips, glue or correction fluid.

DO NOT WRITE IN ANY BARCODES.

Answer all questions.

You should pay attention to punctuation, spelling and handwriting.

At the end of the examination, fasten all your work securely together.

The number of marks is given in brackets [] at the end of each question or part question.

The total number of marks for this paper is 50.

Section A: Reading

Read this extract from an article about dolphins.

Dolphins

Kelly is a pretty amazing dolphin. She lives at a research centre in the USA where the dolphins have been trained to help keep the tanks clean. These dolphins have learned that if they pass a piece of litter to a trainer, they will be rewarded with a fish. Kelly is also a cunning dolphin and she has worked out that she can cheat the system. Every time Kelly finds a scrap of paper, she hides it under a rock at the bottom of her tank. Then, when she **spots** a trainer approaching, Kelly dives down and tears off a small piece to give to the trainer. When the next trainer turns up, Kelly tears off another bit. She seems to be thinking, why get one fish for her piece of paper when she can get lots?

Kelly's practical thinking doesn't stop there. One day a gull flew into her tank. She dutifully gave the bird to a trainer and was rewarded with several fish. This seemed to give her another great idea. When feeding time came around again, she took the last fish down to her secret hiding place under the rock. When the trainers weren't around, it seems she used the fish as bait to attract more gulls so that she could present them to the trainers for a reward.

In fact, this technique worked so well that she taught her calf how to do it. Others also learned this trick and now the group are a regular bunch of gull-baiters. They have learned to **lure** them with the fish they have hidden and to swap their feathery bounty for yet more fishy treats.

This **tale** is a brilliant example of how clever dolphins can be. And, when they happen upon a great idea or just a new game, they can pass on this knowledge to their friends. Kelly's story perfectly **supports** the argument that dolphins do not deserve to be held in concrete tanks to amuse humans.

Now answer these questions in the spaces provided.

1	(a)	What task do the dolphins do to help at the research centre?	
			[1]
	(b)	Why does Kelly hide scraps of paper at the bottom of the tank?	
			[1]
	(c)	What did Kelly teach her calf?	
			[1]

2		e the meaning word or shor	g of each of the following words as it is used in the passage . In each case t phrase.	give
	(a)	spots		[1]
	(b)	lure		[1]
	(c)	tale		[1]
	(d)	supports		[1]
3	Add	the missing	punctuation to these sentences.	
	Dο	you thir	nk dolphins are clever enough to know what we	
	are	e thinkin	g asked the spectator The researcher smiled I	
	d o	nt know	she said They are certainly intelligent friendly	
	a n	d playful		[2]
4	Re-	write this sen	tence, adding a relative clause with further information from the passage.	
	Kell	y is a clever o	dolphin.	
				[1]
5		nbine these th not use <i>and</i> c	nree sentences into one complex sentence. or <i>but</i> .	
	Dolp	ohins live nati	urally in both rivers and oceans.	
	The	y are very int	elligent and playful.	
	Mar	ny dolphins ar	re trained in captivity.	
				[1]
6	Con	nplete this se	ntence, using two different forms of the same verb.	
	The	trainer threw	the first fish, which the dolphin in its mouth,	
	but i	t did not	the second one.	[1]
				[1]

7 Read this extract from a conservation website, and then answer the questions.

There are more than 30 species of dolphin. Most live in oceans across the world, but there are also six species of dolphin which live in fresh water. These are found in rivers in Brazil, China, Colombia, India, Nepal and Pakistan. Dolphins are generally social animals, sometimes living in groups or 'pods' of several hundred.

A number of dolphin species are classified as critically endangered and more are known to be in serious danger but have yet to be formally assessed. One of the greatest threats to dolphins is getting caught up in fishing nets – which can cause them to drown. This causes the deaths of more than 300,000 cetaceans (dolphins, porpoises and whales) every year. The reduction of the dolphin's prey as a result of unsustainable commercial fishing is another reason for its decline.

In order to communicate, dolphins produce clicking sounds and then receive and interpret the returning echoes, in a process known as 'echolocation'. From this they can tell the size, shape, distance, speed and direction of the objects — especially their favoured food of fish and squid. The noise from naval operations and seismic surveys affects their echolocation, which can cause them to become stranded on shore. Being struck by ships and other sea vessels can also cause serious and even fatal injuries to dolphins.

Freshwater dolphins are vulnerable to human activities. They can be threatened by chemical pollution in rivers, lakes and estuaries. They are also at risk from man-made structures such as dams and barrages, which restrict their movement and affect their access to prey and suitable habitat.

Make a list of all the dangers to ocean and river dolphins, and the results of these dangers.

(a)

(b)	Using your list , write a summary of 80–100 words to explain some of the dangers to dolphins, and the results of these dangers. Use your own words as much as possible.
	[4]

Section B: Writing

8 Write an article for a magazine called 'Living Earth', about the harm that pollution is causing the planet.

You could include the following in your article:

- different sorts of pollution air pollution, water pollution, litter, etc.
- the causes and effects of different sorts of pollution
- ways to raise awareness of the harm that pollution causes films, websites, fund-raising events, etc.

pace for your plan	

Write your article on the next page.
